Advanced prototyping and production with carbon fiber-reinforced nylon material.
The Fortus 380mc™ Carbon Fiber Edition 3D Printer prints exclusively with FDM Nylon 12CF™
Carbon Fiber and ASA materials. It fills the gap between capability-limited desktop printers and more
costly production-level printers enabled with carbon fiber-reinforced materials. The heated build
chamber is the same size as the standard Fortus 380mc, preventing warp and curl for consistent part
production regardless of size. Soluble support provides complete design freedom for complex shapes
that include voids and undercuts.

GrabCAD Print™ software provides an easy CAD-to-print workflow. However, Insight™ and
Control Center™ software are also included for job management and production status.

The Fortus 380mc Carbon Fiber Edition is a standalone system. There is no upgrade availability to this
configuration from a standard Fortus 380mc.

### System Specifications

#### System Configuration

<table>
<thead>
<tr>
<th>Build Envelope (XYZ)</th>
<th>355 x 305 x 305 mm (14 x 12 x 12 in.)</th>
</tr>

#### OTHER SPECIFICATIONS

- **System Size and Weight**: 129.5 cm x 90.2 cm x 198.4 cm (51 x 35.5 x 78.1 in.); 601 kg (1,325 lbs.)
- **Achievable Accuracy**: Parts are produced within an accuracy of ± .127 mm (± .005 in.) or ± .0015 mm/mm (± .0015 in/in), whichever is greater. Z part accuracy includes an additional tolerance of -0.000/+slice height. Note: Accuracy is geometry dependent. Achievable accuracy specification derived from statistical data at 95% dimensional yield.
- **Network Communication**: 10/100 base T connection. Ethernet protocol.
- **Operator Attendance**: Limited attendance for job start and stop required.
- **Power Requirements**: 208VAC 3 phase, 50/60 Hz, 18 Amps
- **Regulatory Compliance**: CE, cTUVus, EAC, FCC Part B
- **Software**: All Fortus® systems include Insight and Control Center job processing and management software. Compatible with GrabCAD Print for use with job reports, scheduling and remote monitoring.
- **Operating System**: Microsoft Windows 10 (Pro, Enterprise, Education), Microsoft Windows 8.1 and Windows 8 (Pro, Enterprise), Microsoft Windows 7 (Pro, Enterprise, Ultimate), Microsoft Windows Server 2012 R2. Insight software requires a 64-bit operating system.
Fortus 380mc
Carbon Fiber Edition

At the core: Advanced FDM technology

Fortus systems are based on Stratasys® FDM technology. FDM builds parts in production-grade thermoplastics, enabling the most durable parts.

Fortus systems use a wide range of thermoplastics with advanced mechanical properties so your parts can endure high heat, caustic chemicals, sterilization and high-impact applications.

No special facilities needed

You can install a Fortus 3D Printer just about anywhere. No special venting is required because Fortus systems produce no noxious fumes, chemicals or waste.

No special skills needed

Compared to other additive fabrication systems, Fortus 3D Printers are easy to operate and maintain as there are no messy powders to handle and contain. They’re so simple, an operator can be trained to operate a Fortus system in less than 30 minutes.

Get your benchmark on the future of manufacturing

Fine details. Smooth surface finishes. Accuracy. Strength. The best way to see the advantages of a Fortus 3D Printer is to have your own part built on a Fortus system.
