## Verification Opinion

Based on information available throughout the verification process, there is no evidence that the GHG emissions statement shown above:

1. Is not materially correct and is not a fair representation of the GHG emissions data and information claimed to be reported; and,
2. Has not been prepared in accordance with the World Resources Institute (WRI) / World Business Council for Sustainable Development (WBCSD) Greenhouse Gas (GHG) Protocol Corporate Standard and Corporate Value Chain Standard.

It is our opinion that Stratasys has established appropriate systems for the analysis of quantitative data for the determination of these GHG emissions for the stated period, boundaries, and reference criteria.

## Statement of Independence

Motive is an independent professional services firm specializing in Environmental, Social, and Governance (ESG) support and strategic initiatives. Motive has not participated, either directly or indirectly, in the assessment of Stratasys' GHG emissions. We conducted this verification independently and to our knowledge there has been no conflict of interest.
